

Harley-Davidson Replacement Radio

ASA Electronics

This radio is designed to fit into the factory opening of a Harley-Davidson without the use of any special mounting kit or brackets. The Harley-Davidson Replacement Radio (HD1BT) contains a waterproof face and has been tested against extreme temperatures and vibration. The factory harness plugs directly into the back of the JENSEN radio and can be operated by the factory handlebar controls. The HD1BT is compatible with Bluetooth, iPhone and iPods, and features audio and source control, an AUX-in port, AM/FM radio and weather band.

USMC Motorcycle Gauges

Medallion Instrumentation Systems

Medallion Instrumentation Systems has released a line of Officially Licensed United States Marine Corps motorcycle gauges for 1996-2012 Harley-Davidson touring models. The Marine Corps dress uniform and famous "Eagle, Globe and Anchor" trademark are the inspiration of the graphic design. The gauges are a showpiece during the day and feature stunning backlighting at night. The gauges can fit all touring models with and without fairings with few exceptions. The Medallion USMC Gauges are sold through Medallion, Kuryakyn and J&P Cycles.

Lithium Battery

Earth X Motorsports

The Earth X Lithium Battery is designed to be a drop-in replacement of a standard 12-volt lead acid battery. It has four times the lifespan of a lead acid battery and weighs 70 to 80 percent less. The battery can be fully charged in less than a half hour, and the internal Battery Management System monitors each cell's charge level, protecting them from overcharge. No special charger is required, and batteries are available for a variety of manufacturers, including Polaris, Can-Am, Arctic Cat, Yamaha, Harley-Davidson, Buell, BMW, Honda, Suzuki and more.
